«*Insanity is running the same build over and over again and getting different results*»

Experienced software engineer and open source advocate with a strong background in distributed systems, renewable energy, and FOSS community leadership. Proven track record in backend architecture, CI/CD automation, and impactful open source contributions. Passionate about functional programming, test-driven development, reproducible builds, and bringing innovation to sustainable technologies.

Professional career

2022–current

Backend developer, *tiko Energy Solutions AG*

Architected and developed distributed systems primarily in Haskell, leveraging Nix for reproducible builds. (80 % workload since 2023)

Virtual Power Plant and IoT devices

- Microservices written in Haskell for high-throughput, low-latency device management and ancillary services (FCR + aFRR)
- Legacy monolith written in Java 21 + Scala 2.13
- Redis/Valkey, Kafka, CBOR, MQTT, PostgreSQL, Hazelcast, GraphQL

Data pipelines

- Resilient event-driven pipelines written in Haskell
- MQTT, Kafka, Thrift, Protobuf, Avro, rocksDB-cloud, TimescaleDB, RabbitMQ

Web services

- Built and maintained scalable Haskell APIs (servant, wai/warp)

Quality & test automation

- Propagated behaviour driven development practices, increasing integration test coverage.
- Designed KVM-based integration tests of distributed systems using the `nixosTest` framework, enabling zero rollbacks in VPP service deployments.
- Led efforts to improve the build system, organise and unify the codebase, write and update documentation, and keep dependencies up to date.

Continuous integration, deployment

- Hydra, Morph, Colmena, GitLab, k8s, ArgoCD, Kustomize, Terraform, AWS, SOPS, Dhall
- Release management, regular system deployments

API architecture and collaboration

- Worked with Data Science, Full Stack and Firmware teams to design cross-system APIs.
- Mentored, supported and pair-programmed with junior backend team members.

Monitoring, Alerting

- Implemented OpenTelemetry instrumentation, enabling observability across services.
- Prometheus, Grafana, Zabbix, PagerDuty, Elasticsearch, Kibana
- On-call rotation, incident response, root cause analysis

| 2014–2017 | Research assistant, Projects: PVstore, TwinPower , HTW Berlin |
| | Optimisation of PV systems with batteries and heat pumps. Implementation of simulation models in Matlab. |
| 2013–2014 | Research assistant & intern, Project: PVprog, HTW Berlin |
| | Development of forecast-based operational strategies for PV storage systems. |

Education

| | |
|-----------|---|
| 2016–2017 | Master of Science - Renewable Energy Systems , Hochschule für Technik und Wirtschaft, HTW Berlin GPA: A (with honours), HTW Berlin. |
| 2012–2016 | Bachelor of Science - Renewable Energy Systems , Hochschule für Technik und Wirtschaft, HTW Berlin GPA: A (with honours), HTW Berlin. |

Master's Thesis

| | |
|---------------|--|
| Title | <i>Development of model-based control applications compliant with IEC 61499 for building energy systems with a focus on photovoltaics</i> |
| Supervision | Prof. Dr.-Ing. Volker Quaschning, M. Sc. Tjarko Tjaden |
| Grade | Thesis and oral examination: 1.0 / studies: 1.2 (GPA: A) |
| Short summary | Development of intelligent control applications for PV, battery and heat pump systems in compliance with IEC 61499. Development of communication interfaces for simulation tools such as Polysun and Matlab. Validation via co-simulations. Extension of the runtime environment (4diac-RTE) with a REST communication interface and set-up of a field test. |

Bachelor's Thesis

| | |
|---------------|---|
| Title | <i>Optimierung der Netzeinspeisung von deutschlandweit verteilten PV-Speichersystemen mit prognosebasierten Betriebsstrategien</i> |
| Supervision | Prof. Dr.-Ing. Volker Quaschning, M. Sc. Johannes Weniger |
| Grade | Thesis and oral examination: 1.0 / studies: 1.3 (GPA: A) |
| Short summary | Modelling and CUDA-simulation of 46126 Germany-wide distributed PV storage systems. Examination of the cumulated influence of various operational strategies and optimisation of forecasting- and control algorithms regarding self-sufficiency and grid integration. |

Languages

| | |
|--------------|---------------------------------|
| English | Mother tongue |
| German | Mother tongue |
| Swiss German | Good comprehension (not spoken) |
| French | B1 |

Professional skills

| | |
|--------------------------|---|
| Programming languages | Haskell, Nix, Rust, Elixir, C, Scala, Kotlin, Java, Lua, Python, C++, TypeScript, MATLAB |
| Software engineering | Functional software architecture, test-driven development, behaviour-driven development, pair programming, distributed systems, CI/CD pipelines, release automation |
| Development environment | Neovim, NixOS, tmux, Nushell, jj-vcs |
| Simulation | Polysun, Simulink, TRNSYS |
| Scientific documentation | L <small>A</small> T <small>E</small> X, pandoc |

UNIX is my IDE

Professional interests

| | |
|----------------------|---|
| Renewable energy | Photovoltaics, batteries, thermal systems, eMobility, sector coupling, energy management |
| Software development | FOSS/Linux development, Trade literature, Hackathons, SoCraTes unconferences, Ensemble programming, |

Leisure-time activities

| | |
|-----------|--------------------------|
| Sports | Running, cycling, hiking |
| Cooking | |
| Gardening | |

Publications

| | |
|------------------|---|
| Conference paper | Jakobi, M.; Kunath, L.; Witzig, A. <i>BIM use-case: Model-based performance optimization</i> . EuroSun international conference on solar energy for buildings and industry, Rapperswil, 2018. |
| Conference paper | Jakobi, M.; Stöckli, U.; Tjaden, T.; Quaschning, Q. <i>From simulation to reality: IEC 61499 compliant control applications for solar energy systems</i> . EuroSun international conference on solar energy for buildings and industry, Rapperswil, 2018. |
| Conference paper | Jakobi, M.; Stöckli, U.; Tjaden, T.; Quaschning, Q. <i>Von der Simulation zur Realität: IEC 61499 konforme Regelanwendungen für Solare Energiesysteme</i> . Symposium photovoltaische Solarenergie, Bad Staffelstein, 2018. |
| Thesis | Jakobi, M.: <i>Development of model-based control applications compliant with IEC 61499 for building energy systems with a focus on photovoltaics</i> . Master's thesis, Hochschule für Technik und Wirtschaft, Berlin, 2017. |
| Thesis | Jakobi, M.: <i>Optimierung des Netzeinspeiseverhaltens von deutschlandweit verteilten PV-Speichersystemen mit prognosebasierten Betriebsstrategien</i> . Bachelor's thesis, Hochschule für Technik und Wirtschaft, Berlin, 2016. |
| Data & code | Jakobi, M.; Schmidt, M.; Anyangbe, F. <i>Cell resolved Matlab OOP model of a lithium iron phosphate battery pack</i> , TU Berlin, 2017. |
| Co-author | Weniger, J.; Bergner, J.; Beier, D.; Jakobi, M.; Tjaden, T.; Quaschning, Q.: <i>Grid Feed-in Behavior of Distributed PV Battery Systems</i> . 30th European Photovoltaic Solar Energy Conference and Exhibition, Hamburg, 2015. |
